**IMD BUSINESS SCHOOL**

“

Collaboration with Questers has been successful because they have an excellent network to help us rapidly assess and find the appropriate talented resources.

**Questers** is an IT collaboration company specialized in developing a high performing platform integrating processes and services for tech-oriented companies. We build and help our clients run fully dedicated teams in Eastern Europe. Back in 2007 we pioneered a new approach to remote IT resourcing. Since then we have employed over 1000 technology specialists for partners across the UK, Europe and the US, making Questers an 'employer of choice' for Bulgarian IT professionals seeking to work in an international setting. This allows us to attract and retain the best talent from the local labour market in a wide range of technologies.

REAL WORLD. REAL LEARNING

## COMPANY PRESENTATION

**Client:** IMD Business School

**Website:** [www.imd.org](http://www.imd.org)

**Head Office:** Lausanne, Switzerland

## TEAM SUMMARY

**Team Size:** 12

**Technology:** C#, JavaScript, Objective-C, QA

**Date of reference:** 2017

**Presentation:** IMD is a top-ranked business school, expert in developing leaders, transforming organizations and creating immediate and long-term positive impact.

IMD serves over 8000 Executives from 98 different countries and 120 global companies chose IMD for their customized programs. IMD has over 100,000 Alumni Members. IMD is based in Lausanne, Switzerland and Singapore.

## The Situation

In 2011, IMD had a growing portfolio of projects from iPad applications to delivering modern web applications for our executives. Naturally, to accomplish this, there was a need to expand the existing development team to cope with this high demand. The requirement was to get this done at a reasonably reduced rate while maintaining the highest level of quality.

## The Solution

After exploring different options to our business situation, we selected Questers as this offered the flexibility to find the right team members and create a proper extended dedicated team environment.

We started with recruiting a small team of three members. They travelled to Lausanne, Switzerland where they took part in the team onboarding process and understanding the team culture. This adaptation and onboarding was remarkably easily.

Our approach to involve Sofia team members on the key projects was to structure the delivery with Project Managers based in Lausanne. This worked out extremely well as the technical team in Sofia could focus on delivering the solution. The team had a dedicated office space, scrum area fully equipped with video conferencing systems to ensure uninterrupted collaboration with Project Managers and other Developers back in Switzerland.

By 2013, the team had expanded 12 team members working on three different project streams and delivering business value using Agile methodology. The team consisted of .NET Developers, Quality Assurance Engineers and Mobile Application Developers.

## The Result and Benefits to Date

The team has been very professional, extremely committed and always remained adaptive to the ever-changing business project priorities and challenges. This team also contributed to the enhancement of the Project Management methodology.

**Collaboration with Questers has been successful because they have an excellent network to help us rapidly assess and find the appropriate talented resources.**
