

Questers is an IT resourcing tech park providing a platform of services to market leading technology sector businesses from the UK, Europe and the US. We build and establish dedicated teams in Bulgaria that enhance their capacity and productivity, supporting their growth and continued success in their field.

Our present client base currently includes the world’s largest online grocery retailer, a global gaming business headquartered in the UK, leading FinTech companies, social media platforms, worldwide eCommerce leaders and a variety of scale-ups rapidly expanding their software services and products.

Questers Bulgaria was founded in 2007, pioneering our services-led model in the industry, and we currently work with over 20 different clients, employing 200+ tech specialists in Sofia across a variety of roles.

In 2014 Questers was awarded Top ICT Employer for the Outsourcing of IT Services category in Bulgaria and certified Working with Investors in People, while in 2016 we were shortlisted for European Service Provider of the Year by the Global Sourcing Association. In previous years we have also gained recognition including 3rd place in the Microsoft Sunday Times Tech Track 100, finalist in the HSBC European Business Awards, and 'Cool Vendor' in the Gartner IT Services and Sourcing' report.

WHAT WE OFFER

Our Sofia office is located in a brand new building close to Paradise Mall with high quality workspaces and recreation facilities. As you would expect for a leading technology business we offer stimulating working environment and highly competitive remuneration, a career path in line with your ambitions, additional training opportunities, a wide range of well-being services, benefits package and regular social events and activities.

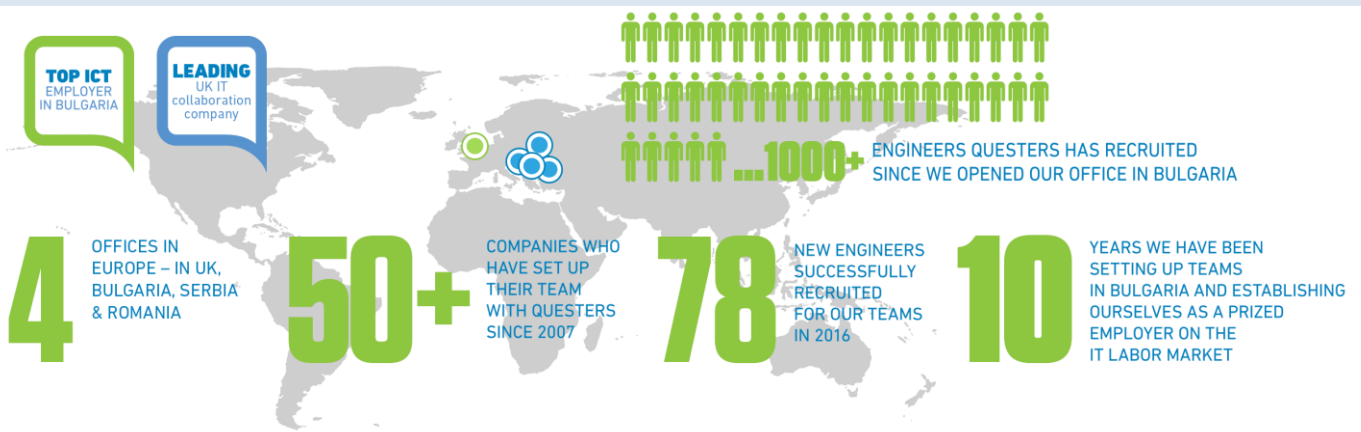

All our employees are secured with a labour contract between them and Questers Bulgaria LTD following strictly the law practices in Bulgaria. Our recruitment campaigns are determined by our clients’ team needs. Except the information about our company we will always provide you with detailed information about the specific client and his long-term targets and plans. Interviews & tests are usually lead by our client’s representatives – in most cases technical staff, after pre-interview by Questers’ HR department.

If you have any questions, comments or concerns do not hesitate to contact us at 02 444 41 32 or careers@questersgroup.com

OUR PARTNER & THEIR TEAM @ QUESTERS

We are really excited to introduce our partner we work with on this campaign to set up the team in Sofia within our operation:

Meet **Version 1**: We pledge "to prove IT can make a real difference to our customers' businesses". We work hard to ensure we understand what our customers need from their technology solutions and then we deliver. We are an award-winning company who provide world class customer service; we think big and we hire great people. Version 1 are more than just another IT services company - we are leaders in implementing and supporting Oracle, Microsoft and AWS technologies. Invest in us and we'll invest in you; if you are driven, committed and up for a challenge, we want to meet you.

JOB PROFILE
**SENIOR JAVA
 DEVELOPER**

Java has been a key technology throughout Version 1's company history, and their Java Practice has been responsible for delivering some of the largest eGovernment systems as well as business critical solutions to the utilities and financial services sectors across a wide range of platforms, operating systems, open source components and databases.

Version 1 utilises best of breed Java toolsets - focused on Micro Services Architectures, powerful front- and backend frameworks, RESTful services, and everything from NoSQL databases like MongoDB and Hadoop, high-performance data grids like HazelCast to multi-node relational systems.

Version 1 gives you a competitive remuneration package, unparalleled opportunities to a rewarding & diverse career path both vertical & horizontal, as well as access to on-going training & development.

Working with Version 1 offers you the opportunity to progress your career with the fastest growing IT Consultancy & services company in Western Europe.

Version 1 is proud to be an award winning company. We strive to be the best we can be, not only for our employees but also for our clients.

JOB OBJECTIVES

You will be working on a significant internal project central to the company's operations. The system is being used daily by hundreds of people and utilizes top technologies.

Project methodologies would include both Waterfall and Agile.

We are looking for talented developers with 3+ years of experience in Java, who would enjoy being part of a small team. We encourage interest from enthusiastic people with an aim for a fast track career in a high energy environment where there is good exposure to cutting-edge technologies.

REQUIRED SKILLS AND EXPERIENCE

- Java
- Spring Framework
- Automated testing frameworks (such as JUnit, Cucumber, Protractor)
- Version Control Systems (CVS, SVN, or GIT)
- RESTful, JMS or SOAP-based services
- Databases: Relational (e.g. Oracle, MySQL or SQL Server)
- IDEs: IntelliJ, Eclipse or Netbeans

Experience in the following is considered an advantage:

- Front-End development experience using HTML5, JavaScript and JavaScript Frameworks (e.g. AngularJS, KnockoutJS or BackboneJS), CSS/SASS/LESS.
- Persistence Frameworks like Hibernate, EclipseLink or iBatis
- Build tools: Ant, Maven, Gradle or sbt
- Application Servers like Tomcat, WebLogic or JBoss
- Experience of working within an Agile environment is desirable.

... and of course you should be able to provide evidence and examples of where you have demonstrated these skills in the past. If so, we'd love to speak with you.
