

Zeelo is growing fast and we're looking to rapidly grow our engineering team to take advantage of significant new market opportunities. We're looking for passionate technologists who are driven by quality delivery and personal growth. We have a strong team culture which emphasises the value of personal responsibility and supporting other team members to achieve in a fast paced environment.

Zeelo connects organizations with vetted fleet operators via a mobile app and best-in-class operational tools. It offers route planning and optimisation software to control costs and target areas poorly served by public transit. Riders, organizations and fleet operators get access to 24/7 support, operational monitoring and contact tracing safety tools.

FRONT-END ENGINEER (REACT)

/ The role:

You will be working on the smart bus platform for organizations with a mission to build the world's leading smart mobility platform for organizations, enabling access to safe and sustainable transportation for everyday journeys. They will be working on a best-in-class technology platform that connects organizations with riders and operator partners via a route optimization platform, mobile apps and operations management system. The product also has an ecological impact reducing CO2 emissions.

/ Your contribution to something big:

- Working with product managers and other developers you will maintain and improve existing products as well as design and deliver new ones
- You will be involved throughout the whole software lifecycle and take part in all agile rituals
- As well as working independently to deliver requirements you've been assigned you will support the wider team to ensure we deliver the best quality products we can.

/ Our ideal teammate has/is:

- Solid experience with ReactJS
- A proficient JavaScript developer, using existing frameworks to build dynamic data driven interactive web experiences
- Experience in working with Frontend technologies like HTML5, CSS3, DHTML, JavaScript
- Experience with REST, JSON

- Produce highly scalable, high quality software
- Experience of agile development rituals
- Appreciation of security best practices
- Experience in using version control systems as GIT and comfortable working with branches
- Strong verbal and written communication skills in English
- Outgoing - able to communicate well externally and also with the rest of the team
- Creative, driven, proactive and motivated to try new things
- A versatile, practical, pragmatic worker capable of working autonomously and as a part of an interdisciplinary team

/Brownie points:

- Have worked integrating different systems with different technologies together
- Have experience with code profiling and performance optimization
- Familiarity with AWS and modern dev ops concepts
- Have worked in a startup or worked on your own projects
