

Questers is a leading tech hub that empowers IT professionals to advance their career through strategic collaborations with prominent companies from the UK, Europe and the US. We build dedicated teams in Bulgaria for leading tech businesses in various industries. Our present client base includes the group behind some of the most powerful media brands in the English speaking world, leading FinTech companies, multi-billion-dollar US hedge fund, social media platforms and a variety of scale-ups rapidly expanding their software services and products. Questers currently hosts dozens of remarkable tech teams and employs more than 200 bright specialists. In 2014 and 2017 Questers was awarded Top ICT Employer as a result of its belief that high productivity can only be achieved by motivating, developing and empowering talented people.

FULL-STACK JAVASCRIPT ENGINEER

/The role:

- In this role, you will be part of the global e-commerce team and work closely with the e-commerce Solutions Developer Lead to develop & test new features for the existing services as well as creating new applications that will solve real life business challenges
- You will use your knowledge in the following areas: analysis and design, software architecture, programming, testing, training, software engineering best practices. Your creativity and proactivity will be essential in proposing proactive solutions

/Your contribution to something big:

- Strengthen and evolve the existing products & services, by helping maintain the code quality and creating new functionalities, as well as testing
- Program new services in an agile way, translate application requirements and use cases into working applications, focusing on the back-end mostly
- Work closely with commercial teams to understand business and identify opportunities, i.e. new or alternative IT solutions to automate tasks, leveraging the increasing number of data sources to drive more data driven decisions or other specific needs and requirements of our users
- Liaise with internal and external partners/suppliers, to ensure worldwide users support and guidance, including adapting or creating documentation and training materials, as well as coordinating feedback and inputs to suppliers
- Back-up the e-commerce Solutions Developer to ensure business & projects continuity in his absence
- Liaise with the IT & CTO teams & Keep up-to-date on the cutting-edge technologies to contribute to the technical choices and high standard solutions of the team

/Our ideal teammate has/is:

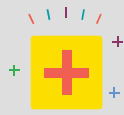

- Be customer oriented and ensure collaboration with IT teams and other departments
- Proven professional web application development experience
- Experience working with Node.js, JavaScript & Typescript & multiple frameworks (Nestjs, Express)
- Fluent in JavaScript (ES6, ES7) and awareness about latest specs
- Experience with microservices architecture, Docker ecosystem and API first approach
- Experience with creating and consuming RESTful and GraphQL APIs
- Broad knowledge of web platforms and technologies
- Familiarity with common source control systems
- Experience with agile methodologies & Compliance aware (data) and app security minded
- Entrepreneur & business mindset combined with passion for quality & efficient coding, Back-End mostly, still has an interest in Front-End
- Great social skills, can do attitude, ready to go outside his/her comfort zone and ability to communicate with various stakeholders
- Bachelor or Master's degree in a relevant field such as Software Engineering & Computer Science
- Experience with continuous integration and continuous deployment is a plus.
- Experience with AWS (serverless, ECS) is a plus
