

We want to help small businesses win. That's why we're here.

We connect small business owners to investors – to create jobs, help families and power economies – because we believe that people are made to do more. And we want to help them.

So, we created the leading online marketplace for small business loans. Our investors have lent £11.4 billion to 100,000 small business owners. In a single year, this lending supported 135,000 jobs and contributed £10 billion to the global economy. There's never been a better time to join!

Be part of the team that changes everything. Let's build the place where small businesses can get the funding they need to win and leave a legacy behind, forever.

MID/SENIOR PYTHON ENGINEER

/ The role:

- We are looking for an experienced, hands-on Mid/Senior Engineer who wants to build a game changing product that addresses some of our small business customers' most pressing problems. This individual will be comfortable operating in an environment of fast pace and uncertainty, and will thrive in solving some really hard problems with a cross-functional team.
- This role offers an exciting opportunity to work with a small team of passionate individuals working in an agile fashion to develop a card solution that integrates to the short term credit product that is being developed simultaneously.

/ Your contribution to something big:

- Collaborate with the Product team and other Engineering teams to prototype, develop and refine new iterations of a new customer-facing product using Python, AWS lambdas and Kafka
- Take an active role in the team's ceremonies
- Bring an innovative mindset to discussions to help explore what can be delivered
- Get involved with the technical direction and best practices of the team
- Share their own software development experiences to help the team grow

Our ideal teammate has/is:

- Extensive commercial experience with Python
- Experience with version control, e.g. GitHub
- Experience in Event-driven systems like Kafka
- Experience working with AWS
- Experience or interest working with Infrastructure as code
- Excellent communication skills, both written and spoken
- Solid understanding of software engineering principles
- Experience or interest in mentoring more junior engineers
- Excited by the opportunity to work in a fast-paced, dynamic environment
