You have skills and ideas. Now, you just need the right task. How about making the future plannable? Because that's what Xempus does. As one of the first and leading InsurTechs in Europe, we work in Munich, Berlin, and Saarbrücken and Sofia on a platform for digital retirement planning – so successfully that we've been growing for more than 10 years. Naturally, our standards are high and we only want the best on board: You!

XEMPUS

RUBY ENGINEER

Your contribution to something big:

- As part of an agile scrum team, you are entirely responsible for a section of the platform

- You develop and maintain Rails modules that interact via Kafka

- You improve what we already have – and you create completely new things.

Our ideal teammate has/is:

- Experience in OO with Ruby and the framework Ruby on Rails (or a mixed experience between Ruby and other backend languages)

- An eye for architecture, scalability, and usability

- A knack for self-explanatory and clean, high-quality and tested code

- An understanding of DevOps concepts such as CI/CD

- Confidence in using git, the Atlassian suite, and relational databases

- An interest and willingness to use modern development methods such as TDD and pair programming
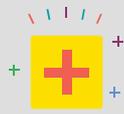

Our offer:
