

Who are we?

We want to help small businesses win. That's why we're here. We connect small business owners to investors – to create jobs, support local communities and power economies – because we believe that people are made to do more. And we want to help realise their goals. So, we created the leading small business loan platform. At the end of 2020, Investors had lent £11.4 billion in 143,000 loans to 100,000 small business owners globally. There's never been a better time to join!

Be part of the team that changes everything. Let's build the place where small businesses can get the funding they need to win and leave a legacy behind, forever.

SOFTWARE ENGINEER (SWITCH TO RUBY & KAFKA)

/The role:

The driving force behind the world's leading platform for small business lending is our engineering team. We are a diverse group from more than 25 different countries and cultures who bring together a wide range of backgrounds and experience (from music to aerospace engineering).

This role sits within the "Tech and Data" teams. The drivers behind our platform – brilliant people working together to create, code, and build the next game changers.

Currently for the Retail Investor team, we're building a whole new team & we're looking for experienced Mid/Senior Engineers who would like to join Funding Circle.

/Your contribution to something big:

- Using Ruby, Kafka, React, PostgreSQL and built entirely on AWS
- Collaborating as part of an agile cross functional team, as well as technology chapters
- Building great user experiences for customers
- Delivering innovation through software to automate processes that enable Funding Circle to operate at scale

/ Our ideal teammate has/is:

- Experience in at least one major coding language (E.g. Java, JavaScript, C#, Python, Clojure, Ruby, Scala, Go)
- Good fundamental programming skills (data structures, algorithms)
- Familiarity developing on Unix/Linux
- Good communication skills, both written and spoken
- Knowledge of Agile, Scrum, BDD, TDD and CI/CD
- An interest or experience in any of Distributed Systems or Event-Driven Architectures
