About Funding Circle: We want to help small businesses win. That's why we're here.

We connect small business owners to investors – to create jobs, help families and power economies – because we believe that people are made to do more. And we want to help them.

So, we created the leading online marketplace for small business loans. Our investors have lent £11.4 billion to 100,000 small business owners. In a single year, this lending supported 135,000 jobs and contributed £10 billion to the global economy. There's never been a better time to join!

Be part of the team that changes everything. Let's build the place where small businesses can get the funding they need to win and leave a legacy behind, forever.

Funding Circle

MID/SENIOR SALESFORCE ENGINEER

/ The role:

- This role sits within the Tech teams. The drivers behind our platform are brilliant people working together to create, code, and build the next game changers.

/ Your contribution to something big:

- Collaborate with cross-functional teams to gather requirements and design, develop, and implement custom Salesforce solutions

- Build and enhance Salesforce applications, integrations, and customizations using Apex, Visualforce, Lightning Web Components (LWC), and other cutting-edge technologies.

- Delivering innovation through software to automate processes that enable Funding Circle to operate at scale

- Troubleshoot and resolve complex technical issues, providing innovative solutions to meet business needs

- Document technical designs, processes, and workflows to maintain a comprehensive knowledge base

- Supporting our production systems

/Our ideal teammate has/is:

- Proven previous hands-on experience with enterprise Salesforce implementations particularly with Sales and Service clouds demonstrated by Salesforce Developer Certifications – App Builder and Platform Developer 1

- Familiarity with Agile software delivery and the use of tools such as Jira, Github and CI/CD

- Highly developed listening skills, excellent customer service skills, and strong professional written and oral communication skills

- Ability to coach and mentor more junior Engineers

/Brownie points:

- Experience working with Apex, Visualforce, SOQL, JavaScript, and Lightning Experience with 3rd party applications (Docusign/Conga) would be beneficial
